INSIDE INFORMATION

Initia L1 restart and DEX reopening

Issuer	Initia Limited
Subject	Initia L1 restart and DEX reopening
Date and time	30 October 2026, 07:07 UTC

The Initia L1 restart is targeted for Monday, November 2, 2026. The network upgrade applies the independently reviewed MoveVM fix and isolates the attacker’s remaining forged balances so they cannot be moved. No transaction will be rolled back, and no INIT was forged in the incident.

The backing of AUSD0, USDC.n and WETH will be fully restored before the restart. Bridges will resume in stages.

To protect liquidity providers, DEX trading will first be limited to a designated operator account until pools such as INIT/USDC and INIT/iUSD are brought back to market prices, after which the restriction will be lifted permanently. The operator will return any profit to affected liquidity providers.
